National Safety Council

SOUTHEASTERN CHAPTER

WELCOME

Each and every day, you make a difference by keeping your employees safe and healthy at work. At the National Safety Council Southeastern Chapter (SCNSC), it is our passion and priority to deliver relevant, impactful training that empowers you to continue this life saving work. Our classes and programs provide the essential tools you need to protect your team, both on and off the jobsite.

Enclosed is our 2025 training calendar, filled with courses designed to fit your team's safety needs. From OSHA 500 to First Aid/CPR, from Work Zone Safety to Defensive Driving, we have you covered! And if a specific date doesn't work, we'd be delighted to arrange exclusive training at your facility. Our experienced trainers are ready to travel throughout the Southeast.

We look forward to partnering with you in the coming year to make your workplaces and our communities safer places to live and work. Please visit us online at scnsc.org or call us at (800) 733-6185 if we can assist you on your safety journey.

Together, we will continue to save lives, from the workplace to anyplace across South Carolina and Georgia.

Sincerely,
Todd Buehrig, President & CEO

FIRST AID, CPR & AED

Prepare for emergencies with nationally accepted first aid classes. They meet the same standards as the American Red Cross and American Heart Association—at prices that won't break your budget.

Having someone at your worksite who can deliver first aid quickly and effectively can be, quite literally, a life-saver. NSC is the expert in occupational first aid and CPR training. Guidelines detailing how rescuers should perform vital first aid and basic life support techniques are updated periodically based on medical research, and NSC is an active participant in this process.

Onsite Training at Your Location

Make training convenient and cost-effective by scheduling an onsite course with SCNSC. We bring our experienced instructors directly to your company, offering flexibility by scheduling sessions at a time and date that works best for you. This allows your team to receive the high-quality training they need without the hassle of traveling or interrupting daily operations. Save on travel costs, minimize disruptions, and ensure your staff stays informed and compliant with our customized onsite training solutions.

Instructor Certification

Teach others what to do—and what not to do—in an emergency. We have spent decades helping organizations and employees prepare for emergency situations. Teach essential emergency skills with the NSC First Aid, CPR & AED course, meeting OSHA requirements for workplace safety. This cost-effective program equips you to train employees or earn money teaching the public life-saving techniques. You'll learn both the "why" behind each topic and effective ways to teach in realistic, hands-on scenarios. Our industry-leading curriculum provides everything you need to deliver impactful training.

Upon successful completion, you will be required to sign a Training Center/Instructor agreement.

The Instructor class includes the complete Instructor Resource Kit:

- › Instructor Manual, USB with Curriculum, Student Workbook

First Aid, CPR & AED Training

NSC First Aid, CPR and AED training teaches the principles of basic life support for adults so you can respond correctly during a medical emergency. You'll learn the latest guidelines for CPR and emergency cardiac care. The training also addresses infection control as well as bleeding emergencies, shock and minor injuries.

Through hands-on training, you'll learn:

- > how to assess the scene of an emergency and take stock of the victim's condition
- > how to perform one-rescuer CPR and rescue breathing
- > how to manage choking in a conscious person

WORKZONE SAFETY

Keep your crew safe with work zone training courses for all levels—from novice flaggers to supervisors. Our training covers essential traffic control, flagging techniques, and safety procedures to protect both workers and the public. Whether managing traffic or overseeing operations, our courses help your team stay compliant, reduce accidents, and ensure safer work zones.

Onsite Training at Your Location

Make training convenient and cost-effective by scheduling an onsite course with SCNSC. We bring our experienced instructors directly to your company, offering flexibility by scheduling sessions at a time and date that works best for you. This allows your team to receive the high-quality training they need without the hassle of traveling or interrupting daily operations. Save on travel costs, minimize disruptions, and ensure your staff stays informed and compliant with our customized onsite training solutions.

TEMPORARY TRAFFIC CONTROL

Temporary Traffic Control Design & Supervision prepares work zone supervisors to interpret, adapt and implement Traffic Control Plans. Temporary Traffic Control is based on the most current federal regulations and reviewed by the leading industry experts. It's based on real-world situations; experienced instructors lead students through problem-solving exercises using the MUTCD and state guidelines. Participants must have one year of documented experience in work zone traffic control.

This two-day program prepares work zone supervisors to interpret, adapt and implement Traffic Control Plans. Temporary Traffic Control is based on the most current federal regulations and reviewed by leading industry experts.

PREREQUISITE REQUIREMENTS

- › COMPLETED PREREQUISITE FORM
- › ONE YEAR OF DOCUMENTED EXPERIENCE IN A WORK ZONE TRAFFIC CONTROL

scnsc.org/ttc

Temporary Traffic Control Design & Supervision (TTC)

This course is a two-day program that prepares work zone supervisors to interpret, adapt, and implement Traffic Control Plans. It focuses on specific job responsibilities and covers information in parts I, V, and VI of the Federal Highway Administration's Manual of Uniform Traffic Control Devices (MUTCD).

Temporary Traffic Control is based on the most current federal regulations and reviewed by leading industry experts. Experienced instructors lead students through problem-solving exercises, using the MUTCD and state guidelines. You can include state and local regulations as well as federal guidelines. There are no expensive, time-consuming prerequisite courses required.

Temporary Traffic Control is for workers responsible for:

- › Establishing and maintaining traffic control devices in or near vehicle right-of-way
- › Keeping workers safe while in or near vehicle right-of-way
- › Installing signs and warning devices
- › Controlling traffic flow in construction, maintenance, or utility work zones
- › This program is also useful for project engineers who want to understand requirements imposed by on-site supervisors and outside contractors

Learning outcomes:

- › Become familiar with the MUTCD and learn to use it as a reference
- › Get the skills and knowledge to interpret a Traffic Control Plan (TCP)
- › Learn to verify the accuracy of existing TCPs and adapt or modify them using the MUTCD
- › Learn to implement a safe TCP

FLAGGER CERTIFICATIONS

Get novice and instructor flagger training with SCNSC. Register for our SCDOT and GDOT approved training courses today! No prerequisites required.

Flagger Instructor Course

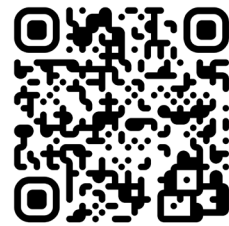

Controlling traffic in work zones is one of the most critical and dangerous tasks in road construction and maintenance. Become an SCNSC Certified Flagger Instructor to gain the knowledge and skills needed to train your crew in safe flagging techniques.

You'll be certified to deliver the Flagger Training Course, teaching standard flagging procedures and ensuring safe passage in and around work areas. The course is designed for individuals with safety and health responsibilities in highway and street construction; bridge, tunnel, water or sewer construction; concrete, utilities, or paving industries; state transportation, and county or municipal street/public works departments.

Why attend? Controlling traffic through work zones is one of the most important and dangerous operations in road construction and maintenance.

The course covers:

- > The Manual on Uniform Traffic Control Devices (MUTCD)
- > ANSI standard ISEA-107-2010
- > How to get students involved in the course
- > How to use course materials
- > Administrative responsibilities
- > Developing effective teaching skills

July 15	Atlanta, GA	December 15	Irmo, SC

Flagger Novice Course

SCNSC's Flagger Training Course is a comprehensive skill-building session that meets both federal and local state guidelines. The foundation of the curriculum is based on the Manual on Uniform Traffic Control Devices (MUTCD) as well as state-specific requirements from South Carolina, Georgia and North Carolina Departments of Transportation. This certification is approved for flagging in these three Southeastern states.

This course is a must for novice construction work zone flaggers in both one and two person flagging operations. Experienced flaggers can attend this course as a refresher. All attendees receive a certificate of course completion.

This 4-hour course is a requirement for novice construction work zone flaggers. Attend a pre-scheduled course from the list below, or contact us to schedule a training for your team at a convenient time and location for you.

The primary objectives of the program are to train flaggers to provide safe passage of traffic through and around work areas and to minimize confusion by bringing standard flagging procedures to our nation's highways.

What you'll learn:

- › Thorough understanding of flagging procedures and proper use of required equipment
- › Improved flagging skills from hands-on training, classroom activities and a flagging skills test
- › Increased ability to coordinate traffic movement through the work zone

BASIC WORK ZONE

A one-day course, ideal for new and rising work zone managers with safety and health responsibilities in:

- › highway and street construction
- › bridge, tunnel, water or sewer construction
- › concrete, utilities, or paving industries
- › state transportation and county or municipal street/public works departments

The Basic Work Zone course teaches safe traffic control strategies to enhance work zone safety for employees and road users. This introductory course covers essential work zone setup requirements from the Federal Highway Administration's Manual of Uniform Traffic Control Devices (MUTCD), addressing one of the most critical and hazardous aspects of construction maintenance.

Course Topics:

- › Introduction and overview of the MUTCD
- › Rules and codes related to public roads
- › Legal requirements for local governments and public entities with regard to roadways and liability
- › Uniformity of traffic control signs and devices
- › Temporary traffic control for streets, roads, bridges and utility repairs
- › Developing plans for temporary traffic control zones, utilizing typical applications in the MUTCD Part 6
- › MUTCD Part 6 I: Roadway incident management

CONVENIENT ONSITE TRAINING

Make training convenient, flexible, and cost-effective with our onsite training programs. In addition to SCNSC's two training centers, headquartered just minutes from the capital cities of Columbia, SC, and Atlanta, GA, we offer the option to bring our experienced instructors directly to your company. Whether you choose one of our prescheduled courses at our state-of-the-art training centers or prefer to schedule a session at your location, we tailor the experience to meet your needs. Onsite training allows your team to receive the high-quality instruction they need without the hassle and expense of travel. We work around your schedule, offering training at a time and date that suits you best, so you can keep operations running smoothly while ensuring your staff stays informed, compliant, and up-to-date on the latest safety protocols.

Book an onsite training for your team for the most convenient and affordable learning experience!

WORKPLACE SAFETY

Take advantage of our 30+ workplace safety training and compliance courses, backed by over 100 years of expertise in workplace safety. Our comprehensive programs are designed to meet the unique safety needs of various industries, ensuring your team is prepared to handle hazards and maintain compliance with the latest safety regulations. From foundational safety practices to specialized training, our courses provide the knowledge and skills your employees need to create safer, more efficient workplaces.

On-site Training at Your Location

Make training convenient and cost-effective by scheduling an onsite course with SCNSC. We bring our experienced instructors directly to your company, offering flexibility by scheduling sessions at a time and date that works best for you. This allows your team to receive the high-quality training they need without the hassle of traveling or interrupting daily operations. Save on travel costs, minimize disruptions, and ensure your staff stays informed and compliant with our customized onsite training solutions.

VIRTUAL FORKLIFT INSTRUCTOR

Our one-day virtual course teaches you to train forklift operators, meet OSHA standards, and instruct safe practices for all staff.

Eligibility

- › This virtual program is designed for forklift operator trainers, forklift operators, warehouse/shipping/receiving managers, construction site managers, safety managers, safety committee members and operations managers. It is not intended for novice trainers.

According to OSHA, a qualified trainer would be a person who, by possession of a recognized degree, certificate, or professional standing or who by extensive knowledge, training and experience has demonstrated the ability to train and evaluate powered industrial truck operators.

Overview

- › OSHA Powered Industrial Truck Standard 1910.178 and 1926.602 compliance
- › How to evaluate operators' performance
- › How to educate non-operators about working safely around powered industrial trucks
- › How to teach safe procedures and maintenance Course materials
- › Engage participants with an easy-to-follow Facilitator Guide and companion DVD (also available on PC/Mac CD-ROM), covering all seven instructional modules

OSHA TRAINING COURSES

At SCNSC, we understand the importance of the Occupational Safety and Health Administration (OSHA) and the vital role they play in safety and health in an evolving work environment. Our trainers will provide you with the knowledge and skills you need to identify and prevent hazards in both General Industry and Construction.

OSHA 10-Hour General Industry

Complete the OSHA General Industry 10-hour course to learn how to identify common hazards in general industry settings. This course is ideal for entry-level workers, safety managers, and anyone interested in workplace safety in general industry. Gain essential safety knowledge to recognize and address common hazards, reduce injuries, and improve compliance and communication on site, with a focus on high-risk areas.

CONSTRUCTION INDUSTRY OSHA-AUTHORIZED TRAINER COURSES

OSHA 500 | Trainer Course for the Construction Industry

Become an OSHA-authorized trainer for the Construction Industry to conduct 10-hour and 30-hour construction industry classes and issue completion cards. These courses teach workers and employers to recognize, avoid, and prevent safety and health hazards, while covering workers' rights and employer responsibilities. You'll develop and present an OSHA Construction Industry Outreach topic, pass a written exam, and receive training materials and resources.

Recommended for:

- › Experienced safety professionals interested in teaching the OSHA 10 and 30-hour construction industry safety and health outreach program to their employees and/or other interested groups

Topics Include:

- › OSHA Outreach Training Program Requirements and Procedures
- › Adult Education Principles
- › Writing Learning Objectives
- › Developing Training Content
- › Use of Multimedia in Presentations
- › Training Methods and Techniques
- › Resources for Safety Training

Included:

- › A digital badge is issued upon completion of the course

OSHA 502 | Update for Construction Industry Outreach Trainers

This course provides an update for currently authorized OSHA Construction Industry Outreach Trainers. Trainers are required to attend this course once every four years to maintain trainer status.

Recommended for:

- › Currently authorized OSHA Construction Industry Outreach Trainers who previously completed the OSHA 500 or OSHA 502 and need to renew their trainer status.

Participants will:

- › Learn significant changes in the Construction Industry that have occurred within the previous four years
- › Demonstrate their ability to effectively deliver OSHA construction industry training

Topics Include:

- › Recent changes in OSHA Construction Industry Standards
- › Updates related to National Emphasis Programs and OSHA's Regulatory Agenda
- › Adult Education Principles and Techniques
- › Resources for Safety Trainers
- › OSHA Outreach Training Program Requirements and Procedures

Included:

- › An updated CFR 1926 Construction Industry Standards book

OSHA 510 | Standards for Construction

This course is a prerequisite for becoming an OSHA-authorized trainer for the Construction Industry. A copy of the 29 CFR 1926 Construction Industry Standards is included with the registration fee. Participants must successfully pass a written exam at the end of the course.

For those interested in becoming authorized to teach 10hr and 30hr OSHA Outreach classes, the OSHA #510 course meets one of two prerequisites for the OSHA #500 Trainer Course for the Construction Industry. Please note, the 30-hour Construction Industry OSHA outreach class is not considered equivalent to OSHA #510.

Recommended for:

- › Those interested or responsible for developing and implementing safety and health programs in the construction industry, plant and facility engineers responsible for contractor safety, experienced safety and health managers looking to expand their knowledge.

Participants will:

- › Describe specific requirements in the OSHA 29 CFR 1926 standards that protect workers from common hazards associated with construction industry workplaces.

GENERAL INDUSTRY OSHA-AUTHORIZED TRAINER COURSES

OSHA 501 | Trainer Course for General Industry

Become an OSHA-authorized trainer to conduct 10-hour and 30-hour general industry classes and issue course completion cards. Successful completion of this course certifies you to teach workers and employers how to recognize, avoid, and prevent workplace hazards. You'll also cover workers' rights, employer responsibilities, and how to file safety complaints, with the ability to issue 10-hour and 30-hour course completion cards. During the course, students will work with a partner to develop a presentation and teach an assigned OSHA General Industry Outreach topic, and successfully pass a written exam. Participants will be provided with a variety of training materials and resources.

Recommended for:

- › Experienced safety professionals interested in teaching the OSHA 10 and 30-hour general industry safety and health outreach program to their employees and/or other interested groups.

Topics Include:

- › OSHA Outreach Training Program Requirements and Procedures
- › Adult Education Principles
- › Writing Learning Objectives

OSHA 7500 | Introduction to Safety and Health Management

This one-day course features information on effective strategies for implementing a safety and health management system in the workplace. The focus of this one-day workshop is the effective implementation of a company's safety and health management system. The workshop addresses the seven elements of an effective safety and health system and those central issues that are critical to each element's proper management. Interactive assignments and thought-provoking group projects enable participants to walk away with a strong understanding of how their organizations can start benefiting from implementing a safety and health management system for their company.

Recommended for:

- › Those interested or responsible for developing and implementing safety and health programs in their workplace

Participants will:

- › Explain the benefits of implementing a safety and health management system.
- › Identify the core elements of an effective safety and health program.
- › Describe the key processes in each program element

Topics include:

- › Overview of a Safety and Health Management System
- › OSHA's guidelines for a Safety and Health Management System
- › Management Leadership
- › Worker Participation
- › Worksite Analysis and Hazard Identification
- › Hazard Prevention and Control
- › Education and Training
- › Program Evaluation
- › Coordinating with Host Employers, Contractors and Staffing Agencies

OSHA 7505 | Introduction to Incident Investigation

This course provides an introduction to basic accident investigation procedures and describes accident analysis techniques. The goal of this course is to help participants gain the basic skills necessary to conduct an effective accident investigation at their workplace. The course is a facilitated, interactive training session focusing on class discussion, case studies and group activities.

Recommended for:

- › Small businesses and managers or staff designated with the responsibility of investigating accidents or near misses in the workplace. This may include supervisory staff, safety committee members, and other personnel responsible for safety

Participants will:

- › Recognize the benefits of an effective investigation for accidents and near misses in the workplace
- › Identify the six-step accident investigation procedure
- › Practice methods for accident investigation through case studies, group activities and discussion

Topics include:

- › Primary reasons and benefits for conducting an effective accident investigation
- › Six-step accident investigation procedure
- › Preserving and documenting an Accident Scene
- › Witness Interview Techniques
- › Root Cause Analysis
- › Developing Correction Action Recommendations

OSHA 7115 | Lockout/Tagout

This course describes the role and responsibility of the employer to develop and implement an energy control program, or lockout/tagout (LOTO) for the protection of workers while performing servicing and maintenance activities on machinery and equipment, using the OSHA standard for Control of Hazardous Energy.

Recommended For:

- › The intended audience is the line supervisor, site manager or safety manager designated with the responsibility for developing and implementing lockout/tagout energy control programs.

Participants Will:

- › Specify the requirements for implementing energy control programs and procedures and conducting training and audits
- › Discover methods of detecting hazardous conditions and implementing control measures

OSHA 7115 **Lockout/Tagout [Controlling Hazardous Energy to Prevent Workplace Injury]** 1 day | \$285

December 18 Virtual

OSHA 7105 | Evacuation and Emergency Planning

This course covers OSHA requirements for emergency action and fire protection plans. Upon course completion students will have the ability to list the elements of an emergency action plan and emergency evacuation floor plans, recognize violations of OSHA exit route requirements, determine whether their organization requires an emergency action plan, and develop and implement workplace emergency action and fire protection plans.

Recommended for:

- › This course is designed for small employers or a designated representative such as a safety specialist, line supervisor or manager responsible for developing an emergency action plan.

Participants will:

- › Identify the need and the process for developing an emergency action plan
- › Describe options for providing for fire, rescue, and medical services
- › Recognize the requirements for an exit route

Topics Include:

- › Purpose and requirements of emergency action and fire prevention plans
- › Integration of emergency plan concepts
- › Design and maintenance of emergency exit routes

OSHA 7105 Evacuation and Emergency Planning 1 day | \$285

DEFENSIVE DRIVING

Car crashes are the leading cause of death and injury in the Southeast. Backed by the National Safety Council, we offer a variety of defensive driving classes for drivers of all ages and stages across GA and SC. Find a course near you or online.

What is Defensive Driving?

Driving to save lives, time and money, in spite of the conditions around you and the actions of others. Why does it matter? Anyone can learn and apply defensive driving skills. They reduce the likelihood of injury and fatality-related crashes, protecting you and others on the road. The defensive driving lessons you learn from our driving courses can truly save lives.

Defensive Driving Instructor

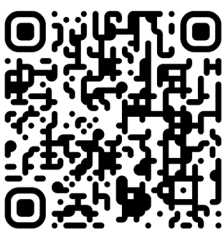

Become an instructor and teach drivers practical, safe-driving techniques that are backed by research and scientific data. Schedule and complete our online training at your convenience.

Getting started is easy! Contact SCNSC to enroll in the Defensive Driving Instructor E-Learning program.

1. Order the Instructor Resource Kit: This kit includes all the tools you need to become an effective Defensive Driving Course (DDC) Instructor.
2. Choose Your Tracks: E-Learning covers the curriculum of the course, or courses, you plan to teach.
 - › 4/6/8-Hour Defensive Driving
 - › Professional Truck Driver
 - › Alive at 25
 - › Attitudinal Dynamics of Driving
3. Complete E-Learning Modules: This web-based course can be completed at your convenience in about 10-14 hours. Once complete, you will be ready to teach!
4. Student Materials: Order student workbooks and certificates before teaching a class.
5. Stay Current: DDC Instructors must conduct at least one training course a year and pay an annual renewal fee of \$65.

Defensive Driving Instructor Course- eLearning Certification 10-14 Hours

4 Hour Defensive Driving Class

Car crashes are the leading cause of injury and death at work. Keep your employees safe with SCNSC's 4-hour defensive driving course. With virtual or in-person training options, you can equip your team with the knowledge and skills they need to stay safe behind the wheel, both on and off the job.

This 4-hour highly interactive defensive driving course is designed to motivate drivers to change their behind-the-wheel behaviors and attitudes. The curriculum helps you avoid collisions and traffic violations by sharing the:

- › highest level of defensive driving knowledge and skills
- › benefits of being a safe and responsible driver
- › techniques for avoiding high-risk driving behaviors

Key Benefits for Drivers

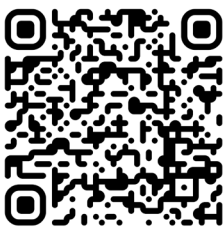

- › Insurance discount if applicable
- › Point reduction approved for North Carolina

The curriculum is similar to our 8-hour course, but it is shorter in duration. Your certificate can be used for insurance premium discounts (where offered by your insurance company).

8 Hour Defensive Driving Class

Boost employee safety with SCNSC's 8-Hour defensive driving course. Our most comprehensive training will help your employees sharpen their defensive driving skills and improve road safety in the Southeast.

This course can be delivered as a virtual training or in-person session at your location of choice, providing flexibility to meet your business needs. Whether your team is on the road for business or personal commutes, this in-depth curriculum equips drivers with the knowledge and techniques to avoid high-risk behaviors and respond effectively to road hazards.

Key Benefits for Employers and Employees

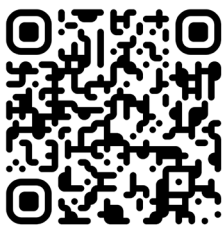

- › Enhanced safety awareness and defensive driving skills
- › Proactive strategies for reducing accidents
- › Improved driving habits that protect your employees and your business
- › Optional Point Reduction: This program is approved for 4-point reduction in South Carolina. The primary focus is on building safer, more responsible drivers, but if your employee needs to remove points from their SC driving record, this is an added benefit of the training.

Our expert-led, highly interactive course ensures your employees are prepared to handle real-world driving challenges, making it an ideal investment in workplace safety.
